Early access 3.3.5

⚠ Builder 3.3.5 is now generally available please upgrade at your earliest opportunity

ⓘ For confluence 3.0 and 2.10 please ensure that you download the -conf210 variant

Our Early Access Programme (EAP) allows interested parties to try out the latest development releases of Theme Builder, prior to the final stable release. As such, you should not use EAP releases in production environments - they may contain bugs or partially complete functionality.

Builder 3.3.5 is a bugfix release primarily to address display issues in confluence 3.0

Builder 3.3.5-M3

- Allow blog macros to filter posts by label
- create add-restriction macro
- Allow blog-list to display a single hardcoded post
- create include-blog macro

Builder 3.3.5-M2

- Fix comments in confluence 3.0
- Update tab css
- Update profile decorator for 3.0
- Use requireResourceForContext
- Add first-child macro
- use parentPageString when creating templated pages
- prevent labels macro from displaying anything when editing a page

Builder 3.3.5-M1

- Fix scrolling in IE
- Ensure that licensing screen shows FREE for all users
- Strip tags from page title
- Allow newpage menulink to use a template
- Fix people directory display
