

blog-rss-feed macro

{blog-rss-feed} Macro

⚠ Under Construction

Description

The blog-rss-feed macro is used to generate an RSS feed link included in the header of the builder theme....

This macro takes exactly the same parameters as the {blog-rss} macro which can be used for prototyping the feeds without needing to cycle through adding the feed to a reader and viewing it.

Usage

```
{blog-rss-feed}
```

Parameters

The "Ver" column shows which version of Theme Builder the parameter became available in.

Property	Required	Default	Notes	Theme Panels Only	Ver
space	✗	@current	The space (or list of spaces) whose posts should be listed (SPACEKEY/@all/@current/@favourite/@global/@personal) NB: the @all parameter must be used on its own, other macro parameters may be used in a list.		3.3
teams	✗	n/a	A list of team labels that can be used to filter the list of spaces		3.3
author	✗	n/a	A list of authors that can be used to filter the list of blog posts		3.3
sort	✗	creation	The order that the posts should be listed in (creation/modified/recent)		3.3
reverse	✗	true	List the blogposts in reverse order (oldest first)		3.3
count	✗	n/a	The number of posts that should be displayed.		3.3
start	✗	0	Offset from the start for listing the posts.		3.3
dateFormat	✗	general config	Format that dates should be displayed in.		3.3
feedTitle	✗	RSS Feed	The title of the RSS feed.		3.3
feedDesc	✗	An RSS Feed	The description of the RSS feed.		3.3
none	✗	n/a	Text to display when no posts have been found		3.3

Examples

Basic Use

Add the {blog-rss} macro to a page/panel where you want to display the RSS feed icon in compatible browsers

```
{blog-rss-feed}
```

CSS Customisation

Not Applicable

Hints and Tips

Use the blog-rss macro to simplify the process of prototyping a feed

Frequently Asked Questions

Multiple feeds can be included in a layout/page to offer a variety of information streams to users
