Early Access 4.2

Our Early Access Programme (EAP) allows interested parties to try out the latest development releases of Theme Builder, prior to the final stable release. As such, **you should not use EAP releases in production environments** - they may contain bugs or partially complete functionality.

The 4.2 release continues on from the 4.1.4 branch of development, the version number has been changed to reflect the large number of fixes and improvements since 4.1.3 and also with the added support for Confluence 3.4.

> ⊘ Builder 4.2 requires Confluence 3.3 or greater.

Builder 4.2-RC3

- Fixed space reordering in Space Admin > Set Parent Space
- Fixed highlighting of current page in pagetree2
- Prevent row cells from wrapping in Manage Spaces when zooming in/out in Chrome
- Prevent login page from loading into Manage Layouts tabs when not logged in
- Ensure 'Log in' links in error messages open in new window
- Fixed 'Switchable Layouts' token list builder in Manage Layouts
- Disable editing of the DEFAULT layout

Builder 4.2-RC2

- Fixed saving of custom CSS, JS, and HTML from Manage Layouts (issue).
- Fixed links to Manage Layouts and Manage Spaces from the layout chooser.
- Fixed links to install plugins, in Content Formatting/Page Info requirement warning messages.

Builder 4.2-RC1

This is our first Release Candidate for 4.2 - please try this if you have been experiencing problems with Theme Builder 4.1.3 or have just upgraded to Confluence 3.3 or 3.4.

- Confluence 3.4 support
- Removed all use of DWR (including Manage Layouts and PageTree2)
- Resources are now copied when a layout is duplicated in the layout manager
- Ensure default layout is cached
- Updated moveto and movetarget help pages
- Link help icon in all Theme Builder admin pages to the Theme Builder docs and removed 'Online User Guide' link from the sidebar
- Show space admin sidebar when in Theme Builder space admin pages
- Made breadcrumb trail consistent in all Theme Builder admin & space admin pages
- Fix date in tooltip when hover over a comment date
- Close gap above breadcrumbs in IE8
- Improve error reporting in Manage Layouts

previous early access milestones in this branch (before version number change):

Builder 4.1.4-M3

- Fixed css/urls for the empty image value (background-image: **none** rather than **url(.png)**)
- Relaxed admin link (web-item) display permissions from system admin to confluence admin

Builder 4.1.4-M2

- Fixed missing quick search text
- Fixed macro browser dialog positioning in IE
- Fixed *themeadmin* destination in menulink macro
- Updated mail.vmd date formatting to match the default confluence mail.vmd
- Don't link to builder admin pages if user is not an admin

Builder 4.1.4-M1

- Removed old Builder Admin UI
- Complete i18n coverage in new Builder Admin pages
- Fixed display of 'Teams' criteria when filtered
- Pass space key via DWR calls and resource action
- Removed deprecated and now unused permission methods
- Allow space admins to create children of the DEFAULT layout
- Fixed Page Restrictions dialog
- Fix to ensure admin sees all spaces in the Manage Spaces table
