End of Support for Internet Explorer 11

Due to Atlassian's decision to end support for IE 11 in AtlasKit, Adaptavist is dropping support for IE 11, effective February 1, 2021.

Suggested workarounds:

Switch to a different browser.

Don't upgrade your Atlassian systems and apps.

Why does Atlassian continue to support IE11?

It doesn't, really. Atlassian is only supporting IE 11 until the application that last supported IE11 reaches EOL. Here is a table with all of the dates:

Product	Version	EOL
Jira	8.5	21 Oct 2021
	7.13	28 Nov 2020
Confluence	7.4	21 Apr 2022
	6.13	04 Dec 2020
Bitbucket	6.10	14 Jan 2022
Bamboo	6.10	17 Sep 2021
