Early Access Programme

Our Early Access Programme (EAP) allows interested parties to try out the latest development releases of Theme Builder, prior to the final stable release. As such, you should not use EAP releases in production environments - they may contain bugs or partially complete functionality.

Available versions

The following are Early access releases for already released versions of builder

- Early access 3.3.5 — a bugfix release primarily to address display issues in confluence 3.0
- Early access 3.3.6 — a bugfix release primarily to address display issues in confluence 3.0
- Early access 4.0.0 — removes usage of the problematic ext-js library and adds builder resources and zipped layout backups
- Early Access 4.0.1 — a bugfix release to add support for confluence 3.1.1 and fix theme-admin permissions tab issues
- Early Access 4.0.2 — a bugfix release to resolve issues with Internet Explorer & Atlassian menu-items
- Early Access 4.0.3 — a backport of bug-fixes addressed by builder 4.1.0
- Early Access 4.1.0 — a compatibility release to add compatibility for confluence 3.3
- Early Access 4.1.4
- Early Access 4.2
- Early Access 4.2.1

Reporting Problems

Please report any issues that you find to Atlassian Plugins Studio
