blog-archive macro

{blog-archive} Macro

⚠️ Under Consruction

Description

The blog-archive macro isused to display a nested list of blog posts and optionally excerpts....

Usage

```
{blog-archive}
```

Parameters

he "Ver" column shows which version of Theme Builder the parameter became available in.

Property	Required	Default	Notes	Theme Panels Only	Ver
space	❌	*@current*	The space (or list of spaces) whose posts should be listed (SPACEKEY/@all/@current/@favourite /@global/@personal/@children) NB: the @all parameter must be used on it's own, other macro parameters may be used in a list.		3.0
label	❌	*n/a*	A list of team labels that can be used to filter the list of blog posts		3.3.5
author	❌	*n/a*	A comma separated list of usernames/group names/@self/@creator/@owner		3.3
sort	❌	*creation*	The order that the posts should be listed in (creation/modified/recent)		3.2
reverse	❌	*true*	List the blogposts in reverse order (oldest first)		3.2
count	❌	*n/a*	The number of posts that should be displayed.		3.2
start	❌	*0*	Offset from the start for listing the posts.		3.2
years	❌	*true*	Nest the list of blogposts by year (true/false)		3.2
months	❌	*true*	Nest the list of blogposts by month (true/false)		3.2
days	❌	*true*	Nest the list of blogposts by month (true/false)		3.2
posts	❌	*true*	Display the individual posts (true/false)		3.2
excerpt	❌	*true*	Display the excerpt of the blogpost (true/false/full)		3.2
none	❌	*n/a*	Text to display when no posts have been found		3.2

Examples

Basic Use

Add the {blog-archive} macro to a page or panel where you want to display a list of blog posts

```
{blog-archive:count=7}
```

Which gives:

1. *2007*

    a. *December*
    b. *Theme Builder 3.0 Beta 23*

       Theme Builder 3.0 beta 23 has been released, adding support for Confluence 2.7.

2. *2008*

    a. *January*
    b. *New tutorial - Adaptavist Website Theme*

       Want to know how we customised the theme for our website? [Read the tutorial...|Adaptavist Website Theme v4] :)
    c. *New tutorial - Space-level theme settings*

       This tutorial shows how to allow a single layout to adapt to a space or page that uses it. This allows you to reduce the number of layouts whilst still allowing space administrators to customise panel content, navigation, menus and colours to their specific needs. [Read the tutorial...|Space-level Theme Settings]
    d. *Publicly downloadable beta*

       Want to download and test the latest beta of Theme Builder? {menulink:pageattachments|page=Builder 3.0.0 beta requests|space=Builder}Click for files{menulink}, [see comments for instructions|Builder 3.0.0 beta requests].
    e. *Changes to builder-breadcrumbs macro*

Just list the blog posts, most recent first

To display A list of blog posts without the nesting, set the years/months/days to false and revent the list from being reversed

```
{blog-archive:count=7|years=false|months=false|days=false|reverse=false}
```

Which gives:

1. *Theme Builder 4.1.3 & 4.0.4 Released*

    These releases ([4.1.3|Builder 4.1.3 Release Notes] for Confluence 3.3 and [4.0.4|Builder 4.0.4 Release Notes] for Confluence 3.1 - 3.2.1) introduce an update to the administration pages. A much cleaner look and feel, and massive speed and browser compatibility improvements to the Manage Spaces and Link Aliases tables. See [Them...
2. *Builder 4.1.1 Released*

    The Builder 4.1.1 release is now available for download. This release fixes a bug with viewing the manage layouts and builder admin interface in Confluence 3.3.
3. *Builder 3.3.6 released*

    Builder 3.3.6 has been released and is available here: [Downloads] More information can be found on the [Builder 3.3.6 release notes] page.
4. *Documentation for Flags feature*

    We've been making lots of enhancements to the flags feature in Theme Builder 3.3.6 and 3.4.0, however there's been little documentation done on this...

Hints and Tips

When excepts are enabled, the macro will output a block of content taken from the top of your blog posts. If you need more control over the excerpts, consider using the excerpt macro.
