Builder 3.0.1 Release Notes

Builder 3.0.1 Release Notes

Notes

- Create new child pages with specific titles uding compound-menuitem.

- You can add listeners to the toggle-sidebar event allowing other page elements to respond dynamically to sidebar calopse and expand.

- <script> now filtered on the JS tab. Only inline javascript should be entered into this tab.

- Fixed a bug in which the web application container context was not rendered when using list-* macros.

- Changed access key text to "skip to content" making it applicable to a wider range of layouts.

- Fixed space.vmd and global.vmd output, output should now have the correct context.
