# **Builder 1.4.0 Release Notes**

## **Builder 1.4 Release Notes**

This version of Builder is deprecated.

This was the first version of Builder to be available for clients hosting Confluence externally to Adaptavist and started the Builder revolution in the Confluence community!

### **Notes**

- Allows simpler customisation of Confluence interface
- Provides menu-based navigation
  Allows CSS injection for greater customisation control

### Recommendations

Don't use this version, it's very old and no longer supported!
