Early Access 4.0.2

Our Early Access Programme (EAP) allows interested parties to try out the latest development releases of Theme Builder, prior to the final stable release. As such, **you should not use EAP releases in production environments** - they may contain bugs or partially complete functionality.

Builder 4.0.2 is a bugfix release to resolve issues with Internet Explorer & Atlassian menu-items

Builder 4.0.2-RC

- Add view-attachment mode to page & blogpost decorator
- Add @parentparent selector
- Avoid checking global permissions for anonymous users

Builder 4.0.2-M5

- Re-instate script compression
- Fix editing of text resources
- Automatically select first link when selecting a new plugin while defining aliases
- Add tinyurl menulink
- Update CodeMirror
- Add some logging to LayoutManager

Builder 4.0.2-M4

- Prevent the upload of empty resource files
- Update dashboard.wiki to pass the 'dashboard' param to recently-updated-dashboard
- Allow builder-show/hide to toggle on whether the space has a @parent or @child
- Allow layout to be defaulted based on the parent space's layout selection
- Add {blog-roll} macro

Builder 4.0.2-M3

- Remove EULA
- Persuade menus to update watch & favourite icons
- Add %PARENT% css/js replacement
- Ensure that jQuery is passing spacekeys to manage-layouts action
- Move reusable content out of theme body into main decorator
- Update permission checking to pass space keys where possible

Builder 4.0.2-M2

- Use contextPath when replacing layout resource urls.
- Avoid using cluster manager before it has been autowired on confluence startup
- Make builder menus compatible with atlassian jQuery enhancements (NB: Watch/Favourite links are working but the display is not updating yet)

Builder 4.0.2-M1

- Fix backup tab in IE
- Add tree-view to {list-spaces}
- Notation guide updates
- Remove reflection from clustered cache abstraction layer
- Ensure all node caches are concurrent
