

# Early Access 4.1.0

Our Early Access Programme (EAP) allows interested parties to try out the latest development releases of Theme Builder, prior to the final stable release. As such, **you should not use EAP releases in production environments** - they may contain bugs or partially complete functionality.

Builder 4.1.0 is a compatibility release to add compatibility for confluence 3.3

Confluence 3.3 is required to run Builder 4.1.0

## Builder 4.1.0-M6

- Fix CCE in watch-menu when viewing space level pages
- Fix NPE in sorted-children when space's parent cant be found
- Fix sorting of root nodes in pagetree2
- Allow move-to macro to perform the move on the server side
- Add the move-target macro to assist move-to in performing the move on the server side

## Builder 4.1.0-M5

- Update notation guide description for sorted-children
- Remove comment body from trim-comments notifications
- Allow layout resources to be renamed
- Clear css caches when setting the parent space
- Ensure labels checks fail when not viewing a page/blogpost
- Allow %count% replacements when the body is empty
- Add flaglogic.wiki
- Remove atl\_token from tinyurl, history & custom menulinks
- Clean up the resources tab
- Ensure @root page is found when viewing pages at the root level
- Add fav-menu & watch-menu menulinks & update macros to use them
- Add logging to make it easier to determine which panel & layout is causing an exception

## Builder 4.1.0-M4

- Allow blog- macros to list posts by username, groupname, @self, @owner & @creator
- Allow confluence colour schemes to be inherited by child spaces
- Add 'session' & 'user' flag types
- Prevent 'wikipage' menulinks throwing an exception when the page does not exist
- Prevent sorted-children from throwing an exception when the page has no children

## Builder 4.1.0-M3

- Prevent trimcomments from generating an email storm by generating a single 'digest' email instead of individual removal messages
- Improve class= parameter on {sorted-children}
- Add switches for page & space siblings for {sorted-children}
- Add countParent switches to {sorted-children}

## Builder 4.1.0-M2

- Fix manage-layouts condition class
- Ensure space hierarchy is fully rebuilt
- Make sorted-children display the space hierarchy when used with @dashboard mode
- Make sorted-children display the parent page & space siblings (but not their children)
- Use the correct i18n key for choose-layout
- Add support for @children spaces in blog- macros
- Move .getText to BuilderUtils
- fix import macro notation guide's use of the layout::resource.ext descriptor
- Allow the spaces displayed by sorted-children & list-spaces to be manually sorted.

## Builder 4.1.0-M1

- Basic confluence 3.3 compatibility
