

Layout Chooser

The Layout Chooser allows you to browse, preview and select Theme Builder layouts...

How do I get here?

If you want to choose a layout for a space, you'll need to be a Space Administrator for that space, or a Site Administrator. Go in to Space Admin and choose the Themes link from the navigation bar.

If you want to choose a layout for the site, you'll need to have Site Administrator privileges. Go in to the Administration Console, and select the Themes link from the navigation bar.

Select Theme Builder as the theme for the site/space and then click the "Configure Theme" link.

Choose which layout to preview

You'll see a list of available layouts in the "Choose Layout..." panel on the left - simply click on a layout to preview it in the tabs on the right.

If you have sufficient privileges you'll also see a link above the Layout Chooser which allows you to access the [Layout Manager](#) (the tool that is used to add and edit layouts) and possibly also a link for [Theme Administration](#) (Site Administrators only).

Overview Tab

This tab provides a quick overview of the layout, showing it's Layout ID, name and description:

OverviewQuick PreviewFull Preview

Layout Id : WM

Name :

Widdows Mason - Website Layout

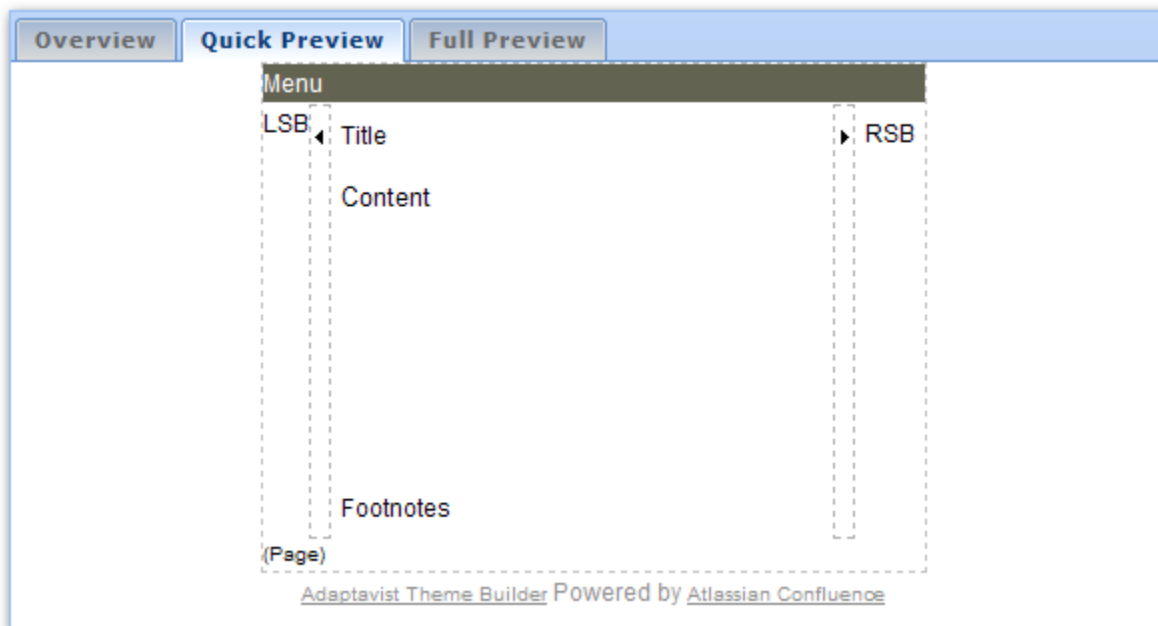

Description :

Website version of WM theme

It's always worth reading the description as it may contain important usage guidelines or information on how you can modify aspects of the layout such as navigation and colours.

Quick Preview Tab

This tab gives a very rough preview of the layout and is useful if your site has lots of layouts and you want to quickly browse through them:

Full Preview Tab

This tab shows you exactly what things will look if you choose the selected layout:

Saving changes

Once you're happy with the choice of layout, click the "Save" button at the top of the Layout Chooser.

If you want to continue using the previous layout, just click "Cancel".

FAQs

You will need to ask a Site Administrator to select the layout on your behalf or remove the "Layout Lock" from your space using the [Manage Spaces Tab](#) in [Theme Administration](#).

If you get a warning message stating that you're not allowed to select the layout, it's because the person who designed the layout has restricted which user groups can choose it for their space design on the [Permissions Tab](#) in the [Layout Manager](#).

In order to select the layout you'll either need to become a member of the user group or ask a Site Administrator to set the layout on your behalf.

If you can't see the link then a Site Administrator has restricted access to the [Layout Manager](#) and you'll have to ask them to add you to a group that has privileges to use it.

You need the Layout ID when using the [use-layout macro](#) or [menulink macro](#) (with a location of "use-layout") to either override the layout for a specific page or dynamically select a different layout for the end-user.

The Layout ID is also used when defining the printable layout in the [Options Tab](#) within the [Layout Manager](#).
