Builder 2.0.1 Release Notes

Builder 2.0.1 Release Notes

This is primarily a bug fix but also contains some new features that didn't quite make it in to the initial 2.0.0 release.

Notes

- New menu links for custom URL's and region toggling
 Improved HTML garbage removal in menu macros
 Some new menu styles

Recommendations

If using Confluence 2.1.x-2.2.x use Builder 2.0.3-conf22.

If using Confluence 2.3 or above, use Builder 2.0.7 or above.
