blog-calendar macro

{blog-calendar} Macro

⚠️ Under Consruction

Description

The blog-calendar macro isused to display a calendar view of available blogposts....

Usage

```
{blog-calendar}
```

Parameters

the "Ver" column shows which version of Theme Builder the parameter became available in.

Property	Required	Default	Notes	Theme Panels Only	Ver
space	❌	*@current*	The space whose posts should be shown		3.3
date	❌	@context	the month which should be shown (@context/@today/@creation/@modified/MMyyy)		3.3

Examples

Basic Use

Add the {blog-calendar} macro to a page or panel where you want to display a calendar of blog posts

```
{blog-calendar}
```

Which gives:

This defaults to the @context date scheme which means that when you are viewing a blogpost then the creation date will be used, when you are viewing the blog archive then the relevant month will be used for the date you are viewing, and when used anywhere else the current date will be used.

Display blog posts for the date the page was created

To display a calendar of blog posts for the month that the currently viewed page was created

```
{blog-calendar:date=@creation}
```

Similarly you can display a list of posts for the month that this page was last modifed

```
{blog-calendar:date=@modified}
```
