Builder 2.0.0 Release Notes

Builder 2.0.0 Release Notes

This version of Theme Builder introduced a visual layout editor and a vast array of other new features including customisable panels, etc.

Notes

- Full support for Global and Personal Space themes
- Visual theme editor
- Rich text editor now works in Firefox
- · Export mail to wiki page
- Lots more configurable panels
- Large number of new macros
- Theme export/import
- Fully editable and far more flexible menus
- 6 months beta testing, 2 months client beta testing!

Recommendations

If using Confluence 2.1.x-2.2.x, use Builder 2.0.3-conf22.

If using Confluence 2.3.x or above, use Builder 2.0.7 or above.
