

Panel Classes and IDs

This document lists the panels available in Theme Builder 2.0 and their CSS classes and HTML IDs...

Builder themed pages are organised in to several panels as illustrated below:

Each panel has a class and most have an ID allowing very precise control over style sheet settings:

Panel	Class	ID
Document	.atb-body	#document
Page	.atb-page	
Header Bar	.atb-header	#header
Menu Bar	.atb-menu	#menu
Navigation Bar	.atb-navigation	#navigation
Left Sidebar	.atb-leftSidebar	#leftSidebar
Left Slider	.atb-sliderleft	#sliderleft
Page Title	.atb-title	#title
Page Content	.atb-content	#content
Page Footntotes	.atb-footnote	footnote
Right Slider	.atb-sliderright	#sliderright
Right Sidebar	.atb-rightSidebar	#rightSidebar
Footer Bar	.atb-footer	#footer

⚠ Wherever possible, avoid using the ID in your style sheet as these may change in later versions of Builder.

FAQs

Try making them more specific, eg:

```
.atb-body .atb-content h1 {  
  color: red;  
}
```
